

Super Cash Drop Deluxe

HOW TO PLAY

- Select your total bet or use the default.
- Press the Spin button to start the game.
- Wins are multiplied by the bet.

HOW TO CALCULATE PAYLINE WINS

- To calculate your total payline win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.
- If three or more identical symbols are lined up, find the win value in the Pay Table. There you can find the value for all symbols for 3 in a row, 4 in a row and 5 in a row. Only the highest winning combination per line is paid out.
- If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- The above doesn't include Free Spin symbols which do not need to be on a payline to award a prize.
- After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.

RETURN TO PLAYER

- The overall theoretical return to player is provided in the pay table.
- The expected payback reflects the theoretical return across a very large number of spins by numerous players over an extended period of time.
- The RTP calculation is based on statistical analysis of the game logic.

RANDOMIZATION

- The reels are spun with a fair and equal chance for each stop position by a certified random number generator.

ADDITIONAL INFORMATION

- In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets are refunded.
