

# Super Jokrz Wild Ultranudge

## HOW TO PLAY

- Press the Spin button to place your bet and start the game.

## HOW TO CALCULATE PAYLINE WINS

- To calculate your total payline win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.
- If three or more identical symbols are lined up, find the win value in the dynamic Pay Table. There you can find the value for all symbols for 3 in a row, 4 in a row and 5 in a row. Only the highest winning combination per line is paid out.
- If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- The above doesn't include Free Spin symbols which do not need to be on a payline to award a prize.
- After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.
